

Flood in Southeast of Myanmar

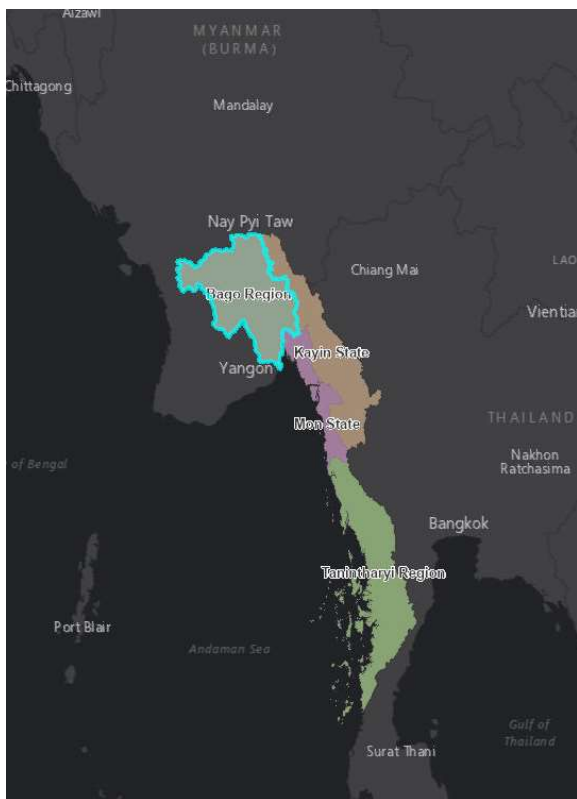

Situation Report (Issue no.3: 22-Sep-2024)

CIDKP is collecting information of the flood affected areas and population in CIDKP's operation areas that cover 4 state/regions: East Bago, Kayin, Mon and Tanintharyi. The flood situation reports will be issued based on the collected data of CIDKP's district and township teams throughout the region.

Highlights

- The Typhoon Yagi swept through northern Vietnam, Laos, Thailand, and Myanmar in early September and caused severe floods, flashfloods, and landslides.
- Based on the collected information up to the date, **411** villages, **49,941** households (**259,397** persons) in Doo Tha Htu (Bilin), Taw Oo (Taungoo), Kler Lwe Htu (Nyaung Lay Pin), Bleed Dawei (Tanintharyi), Mu Traw (Hpa-Pun), Dooplaya, and Hpa-An districts were affected by the flood severely damaged the large scale of paddy fields, food storage facilities, water resources including shallow wells, hand-pump wells, and ponds, latrines, religious buildings, and community buildings. In addition, it also caused loss of livestock and poultry and even caused death of community members.

Summarized Information of the Impact

Affected Population

Sr.	District	# Village	Male	Female	Total	HH
1	Doo Tha Htu	178	53,084	55,209	108,293	18,852
2	Taw Oo	72	33,608	39,751	73,359	15,314
3	Kler Lwe Htu	88	24,286	24,635	48,921	9,641
4	Mu Traw	7	1,615	1,688	3,303	526
5	Blead Dawei	46	9,354	9,906	19,260	4,196
6	Dooplaya	13	2,135	2,296	4,431	1,054
7	Hpa-An	7	853	977	1,830	358

Loss/damaged/destroyed

Sr.	Township	Death (human)	House	School	Health facility	Latrine	Drinking well	Farm (acre)	Livestock	Food storage	Bridge	Road (mile)	Vehicle & machinery	Cart
1	Htantabin	7	305	1		387	2,027	15,152	158	2,007	5	53	2,400	230
2	Bilin							5,502	372				601	
3	Hpa-An							2,750						
4	Thaton							679						
5	Mone													
6	Kyaukkyi													
7	Shwegyin													
8	Taungoo		1,348	3	1	4,200	4,500		2,100					

* More data for this loss/damaged/destroyed is yet to be received from the teams.

Humanitarian Needs

- Support for the food, drinking water, and hygiene kits are the emergency needs.
- Since most of the communities' farms were flooded one time in late July and early August of 2024 and the second time in mid of September 2024, it caused severe damage to paddy fields and late timing for the rehabilitation of the farms for this season.
- This time of flood destroyed desperately the farms, farm tools, vehicles, and machinery of the community members. They are in need of support for livelihood rehabilitation.
- Due to the flood, communities have lost thousands of poultry and livestock, and they are in need of support for restoring animal husbandry that is largely contributing to the domestic consumption and diversification of livelihoods.
- Thousands of hand-dug wells and shallow wells were drowned by the flood, and they need support for the recovery of the water facilities.
